

# CHICAGO VIDEO GAME LAW SUMMIT

The Chicago Video Game Law Summit is Chicago's premiere video game law related event, expected to draw at least 150 attendees as well as local and national press. It is a day of academic panels devoted to the nuanced way video games require unique legal protections from a myriad of diverse legal disciplines. Game developers, industry representatives, legal experts, and many other professionals will explore, explain, and debate the latest issues in video game law.

By sponsoring this event you are not only showing your commitment to the industry, but also providing the organizers with the opportunity to provide more to speakers and attendees. We appreciate your support.

Thank you for your time and consideration.
